TECH-FRONT (SHANGHAI) COMPUTER
CO., LTD., a Chinese corporation,

Defendants.

Case No. 20-cv-07407

**COMPLAINT FOR PATENT
INFRINGEMENT**

DEMAND FOR JURY TRIAL

Plaintiff, Hewlett Packard Enterprise Company (“Plaintiff” or “HPE”), for its Complaint against Defendants, Quanta Computer Inc., Quanta Cloud Technology USA LLC, QCH, Inc., Quanta Manufacturing Incorporation, Quanta Manufacturing Nashville LLC, and Tech-Front (Shanghai) Computer Co., Ltd. (collectively, “Defendants” or “Quanta”), alleges as follows:

I. PARTIES

1. HPE is a Delaware corporation having its principal place of business at 6280 America Center Dr., San Jose, CA 95002. HPE is a global enterprise leader with a comprehensive product portfolio stretching from edge to cloud. Since its 2015 separation from Hewlett-Packard Company—the original Silicon Valley startup—HPE has focused on providing servers, storage, consulting, and support to its customers throughout the United States and abroad. HPE’s portfolio of servers includes a range of rack, blade, and other products customizable to meet the needs of its customers:

ProLiant DL380 Server

Apollo 4510 Server

BladeSystem c7000

Synergy 660 Compute Module

2. On information and belief,¹ Defendant Quanta Computer Inc. (“Quanta

¹ Allegations made on information and belief are made in good faith and will likely have further evidentiary support after a reasonable opportunity for further investigation or discovery.

Computer”) is a corporation existing under the laws of Taiwan doing business in the United States, the State of California, and this judicial district, including without limitation by and through its U.S. subsidiaries named as co-defendants in this Complaint and other subsidiaries, affiliate companies, sales offices, manufacturing and/or service facilities, and/or research and development centers. Quanta Computer has a registered address at No. 211, Wenhau 2nd Road, Guishan District Taoyuan City 333, Taiwan.

3. On information and belief, Defendant Quanta Cloud Technology USA LLC (“QCT”), formerly QCT LLC, is a California limited liability company doing business in and/or directed towards this judicial district, with a principal place of business at 1010 Rincon Circle, San Jose, CA, 95131, and is a subsidiary of Defendant Quanta Computer.

4. On information and belief, Defendant QCH, Inc. (“QCH”) is a Nevada corporation doing business in and/or directed towards this judicial district, with a registered address at 100 West Liberty Street, 10th Floor, Reno, NV 89501, and is a subsidiary of Defendant Quanta Computer. QCH is registered to conduct business in the State of California, and, according to information submitted by QCH to the Secretary of State of California, QCH’s Secretary, Mr. Alan Pak-Lin Lam, conducts business on behalf of QCH at 45638 Northport Loop East, Fremont, CA 94538.

5. On information and belief, Defendant Quanta Manufacturing Incorporation (“QMI”) is a California corporation doing business in and/or directed towards this judicial district, with a principal place of business at 45638 Northport Loop East, Fremont, CA 94538, and is a subsidiary of Defendant Quanta Computer.

6. On information and belief, Defendant Quanta Manufacturing Nashville LLC (“QMI Nashville”) is a California limited liability company doing business in and/or directed towards this judicial district, with a registered address at 1621 Heil Quaker Boulevard, LaVergne, TN 37068, and is a subsidiary of Defendant Quanta Computer.

7. On information and belief, Defendant Tech-Front (Shanghai) Computer Co., Ltd. (“Tech-Front”) is a Chinese limited liability company doing business in and/or directed towards this judicial district, with a registered address at No. 2 Lane 58 Sanzhuang Road, Songjiang

Export Processing Zone, Shanghai 201613, China, and is a subsidiary of Defendant Quanta Computer.

8. On information and belief, Defendants jointly make, use, sell, offer for sale, and/or import certain servers, storage devices, networking devices, and components thereof, including the Quanta Microserver, QuantaGrid, and QuantaPlex-branded servers and storage devices, QuantaVault-branded storage devices, Quanta Drive Bay-branded hard drive bays, and QuantaMesh-branded network devices (the “Accused Products”).

9. Defendants’ actions have caused HPE harm and will cause further harm to HPE if Defendants’ actions continue. In addition, Defendants’ knowing acts of infringement will frustrate HPE’s continued strong business relationships, contracts, and potential contracts, resulting in lost sales and profits, and otherwise are or will cause substantial harm to HPE’s business.

10. As a result of Defendants’ actions, HPE brings this lawsuit to protect its intellectual property and its reputation as a world-wide leader in the sale of servers, storage devices, and networking devices.

II. JURISDICTION AND VENUE

11. This is a civil action arising under the patent laws of the United States, 35 U.S.C. §§ 1 *et seq.* This Court has jurisdiction over the subject matter of this action pursuant to 28 U.S.C. §§ 1331 and 1338(a).

12. On information and belief, Defendants are subject to this Court’s personal jurisdiction because they are, jointly and separately, doing and have done substantial business in this District, including business related to the sale and distribution of the Accused Products. Defendants have continuous and systematic business contacts with the State of California, and either directly or through subsidiaries and intermediaries conduct business in California by shipping, distributing, offering for sale, selling, and/or advertising the Accused Products in the State of California and the Northern District of California. Defendants also, directly or through their subsidiaries and intermediaries, conduct business in California and in the Northern District of California through regular and established places of business located at 1010 Rincon Circle,

San Jose, CA, 95131 and 45638 Northport Loop East, Fremont, CA 94538. Defendants, directly or through their subsidiaries and intermediaries, have purposefully and voluntarily placed the Accused Products into the stream of commerce with the intention and expectation that the Accused Products will be purchased and used by customers in the Northern District of California, including by importing the Accused Products through the Port of Oakland within the Northern District of California and through other ports within the State of California. Therefore, the exercise of jurisdiction over Defendants is proper under the applicable jurisdictional statutes and would not offend traditional notions of fair play and substantial justice.

13. Venue is proper in this judicial district pursuant to 28 U.S.C. §§ 1391(a), 1391(c), and/or 1400(b) at least because, among other reasons, Defendants are subject to personal jurisdiction in this District and have committed acts of infringement in this District, maintain one or more regular and established places of business in this District, and/or in the cases of Quanta Computer and Tech-Front are foreign corporations that are disregarded for purposes of venue. *See, e.g., supra* ¶¶ 2-7, 12.

III. INTRADISTRICT ASSIGNMENT

14. Under Civil L. R. 3-2(c), this action for patent infringement shall be assigned on a district-wide basis.

IV. PATENTS-IN-SUIT

15. HPE is the sole owner of U.S. Patent No. 8,218,566 (the “’566 patent”), entitled “Systems and methods for making serial ports of existing computers available over a network,” naming Andrew Brown as its inventor and issued on July 10, 2012. A true and correct copy of the ’566 patent is attached to this Complaint as Exhibit A.

16. HPE is the sole owner of U.S. Patent No. 7,567,522 (the “’522 patent”), entitled “Suppression of router advertisement,” naming Olaf Borowski as its inventor and issued on July 28, 2009. A true and correct copy of the ’522 patent is attached to this Complaint as Exhibit B.

17. HPE is the sole owner of U.S. Patent No. 7,966,389 (the “’389 patent”), entitled “System and method for application programming interface for extended intelligent platform management,” naming Gerald J. Kaufman, Jr. as its inventor and issued on June 21, 2011. A true

and correct copy of the '389 patent is attached to this Complaint as Exhibit C.

18. HPE is the sole owner of U.S. Design Patent No. D699720 (the "D720 patent"), entitled "Hard drive carrier," naming Keith J. Kuehn and Brooks Vaughan as its inventors and issued on February 18, 2014. A true and correct copy of the D720 patent is attached to this Complaint as Exhibit D.

19. The '566 patent, '522 patent, '389 patent, and D720 patent are referred to collectively herein as the "Patents-in-Suit."

VI. THE ACCUSED PRODUCTS

20. The Accused Products include, but are not limited to, Defendants' Quanta Microserver, QuantaGrid, and QuantaPlex-branded servers and storage devices, QuantaVault-branded storage devices, Quanta Drive Bay-branded hard drive bays, and QuantaMesh-branded network devices.

21. The Accused Products that infringe at least one claim of the '566 patent include at least Defendants' Quanta Microserver, QuantaGrid, and QuantaPlex-branded servers and storage devices, and QuantaVault-branded storage devices (the "'566 Patent Accused Products").

22. The Accused Products that infringe at least one claim of the '522 patent include at least Defendants' QuantaMesh-branded ethernet and bare metal switches (the "'522 Patent Accused Products").

23. The Accused Products that infringe at least one claim of the '389 patent include at least Defendants' Quanta Microserver, QuantaGrid, and QuantaPlex-branded servers and storage devices, and QuantaVault-branded storage devices (the "'389 Patent Accused Products").

24. The Accused Products that infringe the design claimed in the D720 patent include the Quanta Drive Bay, as is included in at least Defendants' Quanta Microserver, QuantaGrid, and QuantaPlex-branded servers and storage devices, and QuantaVault-branded storage devices (the "D720 Patent Accused Products").

FIRST CLAIM FOR RELIEF

(Infringement of U.S. Patent No. 8,218,566)

25. HPE realleges and incorporates by reference the allegations stated in paragraphs 1

through 24 of this Complaint.

26. In violation of 35 U.S.C. § 271, Defendants have infringed and are currently infringing one or more claims of the '566 patent, including but not limited to claims 1, 7, and 16, in this District and throughout the United States, directly and/or indirectly through third parties, by making, using, selling, offering for sale, and/or importing into the United States, without authority, the '566 Patent Accused Products. Defendants have infringed and are currently infringing literally and/or under the doctrine of equivalents.

27. For example, the '566 Patent Accused Products contain each element of and infringe exemplary claim 1 of the '566 patent, which recites:

Claim 1. A system for making serial ports of existing computers available over a network, comprising:

[a] a serial controller for locally controlling at least one serial port of a networked computer; and

[b] a management processor operatively associated with the networked computer and operable in both a first mode and a second mode,

[c] the management processor operating in the first mode to disable local control of the at least one serial port by the serial controller, the management processor taking control of the at least one serial port for network access in the first mode, and

[d] the management processor operating in the second mode to return control of the at least one serial port to the serial controller.

28. Defendants infringe each element of claims 1, 7 and 16 of the '566 patent at least for the exemplary reasons set forth in the claim chart attached hereto as Exhibit E, incorporated herein by reference. Exhibit E sets out exemplary evidence showing how the accused QuantaGrid series servers, including but not limited to, for example, the QuantaGrid D51PS-1U server, includes each element of claims 1, 7, and 16 of the '566 patent.

29. On information and belief, Defendants indirectly infringe the '566 patent under 35 U.S.C. § 271(b) by actively and knowingly inducing others to make, use, sell, offer for sale, or import the '566 Patent Accused Products. These products, as provided by Defendants to their customers and used as intended and instructed, infringe the '566 patent. Defendants sold and/or

1 offered for sale one or more of the '566 Patent Accused Products, and are continuing to do so, to
2 customers with the specific intent to actively encourage them to use one or more of the '566
3 Patent Accused Products in the United States in a manner that Defendants know to be infringing.

4 30. On information and belief, Defendants have also contributed to and/or are
5 contributing to the infringement of the '566 patent under 35 U.S.C. § 271(c) by making, using,
6 importing, offering for sale, and/or selling one or more of the '566 Patent Accused Products.
7 Defendants have made and/or sold such products with knowledge that they are especially
8 designed for use in a patent system and/or apparatus for use in a patented process and are not
9 staple articles of commerce suitable for substantial non-infringing use. For example, among other
10 things, on information and belief, Defendants actively and knowingly sell such products and
11 provide customer support, installation and instruction materials, and other documentation to
12 customers for such products' use as a component of a patented system and/or apparatus for use in
13 a patented process. On information and belief, Defendants' customers have used and continue to
14 use such products in the United States in this manner and infringed the '566 patent.

15 31. Defendants have had actual knowledge of the '566 patent and of their infringement
16 of this patent at least as of the date that Defendants were served with notice of this Complaint.

17 32. As of the filing of this Complaint, Defendants are not licensed or otherwise
18 authorized to practice the claims of the '566 patent.

19 33. As a direct and proximate result of Defendants' infringement of the '566 patent,
20 HPE has been and continues to be damaged in an amount yet to be determined.

21 **SECOND CLAIM FOR RELIEF**

22 (Infringement of U.S. Patent No. 7,567,522)

23 34. HPE realleges and incorporates by reference the allegations stated in paragraphs 1
24 through 33 of this Complaint.

25 35. In violation of 35 U.S.C. § 271, Defendants have infringed and are currently
26 infringing one or more claims of the '522 patent, including but not limited to claim 8, in this
27 District and throughout the United States, directly and/or indirectly through third parties, by
28 making, using, selling, offering for sale, and/or importing into the United States, without

1 authority the '522 Patent Accused Products. Defendants have infringed and are currently
2 infringing literally and/or under the doctrine of equivalents.

3 36. For example, the '522 Patent Accused Products are programmed to perform each
4 element of and infringe exemplary claim 8 of the '522 patent, which recites:

5 Claim 8. A method for suppressing a router advertisement, the method
6 comprising:

7 [a] receiving a router advertisement by a network device;

8 [b] permitting transmission, by a first port in the network device, of any router
9 advertisement that is received by the first port; and

10 [c] filtering, by a second port in the network device, any router advertisement that
11 is received by the second port from an unauthorized device.

12 37. Defendants infringe each step of claim 8 of the '522 patent at least for the
13 exemplary reasons set forth in the claim chart attached hereto as Exhibit F, incorporated herein by
14 reference. Exhibit F sets out exemplary evidence showing how the accused Quanta network
15 switches, including but not limited to, for example, QuantaMesh ethernet and bare metal
16 switches, are programmed to perform each step of claim 8 of the '522 patent. Additionally, on
17 information and belief, Defendants directly infringe each step of claim 8 of the '522 patent
18 through qualification, testing, or similar activities in the United States.

19 38. On information and belief, Defendants indirectly infringe the '522 patent under 35
20 U.S.C. § 271(b) by actively and knowingly inducing others to make, use, sell, offer for sale, or
21 import the '522 Patent Accused Products. These products, as provided by Defendants to their
22 customers and used as intended and instructed, infringe the '522 patent. Defendants sold and/or
23 offered for sale one or more of the '522 Patent Accused Products, and are continuing to do so, to
24 customers with the specific intent to actively encourage them to use one or more of the '522
25 Patent Accused Products in the United States in a manner that Defendants know to be infringing.

26 39. On information and belief, Defendants have also contributed to and/or are
27 contributing to the infringement of the '522 patent under 35 U.S.C. § 271(c) by making, using,
28 importing, offering for sale, and/or selling one or more of the '522 Patent Accused Products.
Defendants have made and/or sold such products with knowledge that they are especially

1 designed for use in a patented system and/or apparatus for use in a patented process and are not
2 staple articles of commerce suitable for substantial non-infringing use. For example, among other
3 things, on information and belief, Defendants actively and knowingly sell such products and
4 provide customer support, installation and instruction materials, and other documentation to
5 customers for such products' use as a component of a patented system and/or apparatus for use in
6 a patented process. On information and belief, Defendants' customers have used and continue to
7 use such products in the United States in this manner and infringed the '522 patent.

8 40. Moreover, on information and belief, Defendant Quanta Computer takes active
9 steps to induce infringement of at least claim 8 of the '522 patent by Defendants QCT, QCH,
10 QMI, and/or QMI Nashville (the "US Defendants"), knowing that those steps will induce,
11 encourage, and facilitate direct infringement by the US Defendants. On information and belief,
12 Defendant Quanta Computer directs or controls the US Defendants' performance of claimed steps
13 by taking active steps that include, but are not limited to, instructing the US Defendants to use the
14 '522 Patent Accused Products, manufacture the '522 Patent Accused Products, configure and/or
15 program the '522 Patent Accused Products, providing the US Defendants with instructions on the
16 use of the '522 Patent Accused Products, encouraging the US Defendants to make and/or use the
17 '522 Patent Accused Products, and/or selling the '522 Patent Accused Products and their
18 components. On information and belief, the benefit to the US Defendants includes the
19 availability of products to sell to customers for profit, and Defendant Quanta Computer
20 conditions the US Defendants' receipt of the product and subsequent sale to customers on taking
21 steps of the claimed method. On information and belief, Defendant Quanta knew or should have
22 known that such activities induce the US Defendants to infringe at least claim 8 of the '522 patent
23 since at least the filing of this Complaint.

24 41. On information and belief, Defendant Quanta Computer also contributes to the
25 infringement of at least claim 8 of the '522 patent by the US Defendants. Acts by Defendant
26 Quanta Computer that contribute to the infringement by the US Defendants include providing the
27 '522 Patent Accused Products, components, and related parts for performing the claimed method
28 in the manner described in Exhibit F and in this Complaint. The '522 Patent Accused Products,

1 components, and related parts are especially adapted for the infringing process, and they have no
 2 substantial non-infringing uses. On information and belief, Defendant Quanta Computer knew or
 3 should have known that such activities contribute to the US Defendants infringement of at least
 4 claim 8 of the '522 patent since at least the filing of this Complaint.

5 42. Defendants have had actual knowledge of the '522 patent and of their infringement
 6 of this patent at least as of the date that Defendants were served with notice of this Complaint.

7 43. Defendants are not licensed or otherwise authorized to practice the claims of the
 8 '522 patent.

9 44. As a direct and proximate result of Defendants' infringement of the '522 patent,
 10 HPE has been and continues to be damaged in an amount yet to be determined.

11 45. HPE has complied with applicable requirements of 35 U.S.C. § 287 such that it
 12 may recover any pre-suit damages to which it is entitled for infringement of the '522 patent.

13 **THIRD CLAIM FOR RELIEF**

14 (Infringement of U.S. Patent No. 7,966,389)

15 46. HPE realleges and incorporates by reference the allegations stated in paragraphs 1
 16 through 45 of this Complaint.

17 47. In violation of 35 U.S.C. § 271, Defendants have infringed and are currently
 18 infringing one or more claims of the '389 patent, including but not limited to claims 1 and 9, in
 19 this District and throughout the United States, directly and/or indirectly through third parties, by
 20 making, using, selling, offering for sale, and/or importing into the United States, without
 21 authority the '389 Patent Accused Products, which practice this claim. Defendants have infringed
 22 and are currently infringing literally and/or under the doctrine of equivalents.

23 48. For example, the '389 Patent Accused Products contain each element of and
 24 infringe exemplary claim 1 of the '389 patent, which recites:

25 Claim 1. A system for controlling a computer system comprising:

26 [a] a management controller; and

27 [b] a plurality of sensors coupled to the management controller; wherein the
 28 management controller contains a plurality of sensor data record objects in a

1 sensor data record repository, wherein a plurality of the sensor data record objects
2 contain data received from the plurality of sensors, and

3 [c] at least one additional sensor data record object contains a property descriptor;
4 wherein the property descriptor references a property data object accessible to the
management controller;

5 [d] wherein the sensor data record objects and the property data objects are
6 configured to be read through an interface, and

7 [e] wherein the property data objects are configured to be written through the
8 interface to control the computer system.

9 49. Defendants infringe each element of claims 1 and 9 of the '389 patent at least for
10 the exemplary reasons set forth in the claim chart attached hereto as Exhibit G, incorporated
11 herein by reference. Exhibit G sets out exemplary evidence showing how the accused
12 QuantaGrid series servers, including but not limited to, for example, the QuantaGrid D52B-1U
server, includes each element of claim 1 and 9 of the '389 patent.

13 50. On information and belief, Defendants indirectly infringe the '389 patent under 35
14 U.S.C. § 271(b) by actively and knowingly inducing others to make, use, sell, offer for sale, or
15 import the '389 Patent Accused Products. These products, as provided by Defendants to their
16 customers and used as intended and instructed, infringe the '389 patent. Defendants sold and/or
17 offered for sale one or more of the '389 Patent Accused Products, and are continuing to do so, to
18 customers with the specific intent to actively encourage them to use one or more of the '389
19 Patent Accused Products in the United States in a manner that Defendants know to be infringing.

20 51. On information and belief, Defendants have also contributed to and/or are
21 contributing to the infringement of the '389 patent under 35 U.S.C. § 271(c) by making, using,
22 importing, offering for sale, and/or selling one or more of the '389 Patent Accused Products.
23 Defendants have made and/or sold such products with knowledge that they are especially
24 designed for use in a patented system and/or apparatus for use in a patented process and are not
25 staple articles of commerce suitable for substantial non-infringing use. For example, among other
26 things, on information and belief, Defendants actively and knowingly sell such products and
27 provide customer support, installation and instruction materials, and other documentation to
28 customers for such products' use as a component of a patented system and/or apparatus for use in

1 a patented process. On information and belief, Defendants' customers have used and continue to
2 use such products in the United States in this manner and infringed the '389 patent.

3 52. Defendants have had actual knowledge of the '389 patent and of their infringement
4 of this patent at least as of the date that Defendants were served with notice of this Complaint.

5 53. As of the filing of this Complaint, Defendants are not licensed or otherwise
6 authorized to practice the claims of the '389 patent.

7 54. As a direct and proximate result of Defendants' infringement of the '389 patent,
8 HPE has been and continues to be damaged in an amount yet to be determined.

9 **FOURTH CLAIM FOR RELIEF**

10 (Infringement of U.S. Design Patent No. D699,720)

11 55. HPE realleges and incorporates by reference the allegations stated in paragraphs 1
12 through 54 of this Complaint.

13 56. In violation of 35 U.S.C. § 271, Defendants have infringed and are currently
14 infringing the ornamental design claimed in the D720 patent, in this District and throughout the
15 United States, directly and/or indirectly through third parties, by making, using, selling, offering
16 for sale, and/or importing into the United States, without authority the D720 Patent Accused
17 Products. Defendants have infringed and are currently infringing literally and/or under the
18 doctrine of equivalents.

19 57. For example, the Accused Products contain an "ornamental design for a hard drive
20 carrier, as shown and described" in the D720 patent, such as the ornamental design shown in the
21 following figures from the D720 patent:

1 58. Defendants infringe the claimed design of the D720 patent at least for the
2 exemplary reasons set forth in the claim chart attached hereto as Exhibit H, incorporated herein
3 by reference. Exhibit H sets out exemplary evidence showing how the accused Quanta Drive
4 Bay, including but not limited to, for example, as included in the QuantaGrid D52BM-2U server,
5 includes an ornamental design for a hard drive carrier that, in the eyes of an ordinary observer, is
6 a substantially similar design to that claimed in the D720 patent.

7 59. On information and belief, Defendants indirectly infringe the D720 patent under
8 35 U.S.C. § 271(b) by actively and knowingly inducing others to make, use, sell, offer for sale, or
9 import the D720 Patent Accused Products. These products, as provided by Defendants to their
10 customers and used as intended and instructed, infringe the D720 patent. Defendants sold and/or
11 offered for sale one or more of the D720 Patent Accused Products, and are continuing to do so, to
12 customers with the specific intent to profit from the sale of infringing products that include the
13 ornamental design claimed in the D720 patent.

14 60. On information and belief, Defendants have also contributed to and/or are
15 contributing to the infringement of the D720 patent under 35 U.S.C. § 271(c) by making, using,
16 importing, offering for sale, and/or selling one or more of the D720 Patent Accused Products.
17 Defendants have made and/or sold such products with knowledge that they are especially
18 designed with the ornamental design claimed in the D720 patent and are not staple articles of
19 commerce suitable for substantial non-infringing use.

20 61. Defendants have had actual knowledge of the D720 patent and of their
21 infringement of this patent at least as of the date that Defendants were served with notice of this
22 Complaint.

23 62. As of the filing of this Complaint, Defendants are not licensed or otherwise
24 authorized to practice the claims of the D720 patent.

25 63. On information and belief, Defendants have obtained profits by virtue of their
26 infringement of the D720 patent.

27 64. As a direct and proximate result of Defendants' infringement of the D720 patent,
28 HPE has been and continues to be damaged in an amount yet to be determined.

PRAYER FOR RELIEF

WHEREFORE, HPE prays that this Court enter judgment as follows:

- (A) Adjudicating and declaring that Defendants have infringed and are infringing the Patents-in-Suit;
- (B) Adjudicating and declaring that Defendants have induced and are inducing infringement of the Patents-in-Suit;
- (C) Adjudicating and declaring that Defendants have contributed to and are contributing to infringement of the Patents-in-Suit;
- (D) Adjudicating and declaring that the Patents-in-Suit are valid and enforceable;
- (E) Preliminarily and permanently enjoining Defendants, their officers, agents, servants, employees, attorneys and all persons in active concert or participation with Defendants from further infringement of the Patents-in-Suit or, to the extent not so enjoined, ordering Defendants to pay compulsory ongoing royalties for any continuing infringement of the Patents-in-Suit;
- (F) Ordering that Defendants must account, and pay actual damages (but no less than a reasonable royalty), to HPE for Defendants' infringement of the Patents-in-Suit, including ordering that Defendants must pay HPE the total profits realized by Defendants from their infringement of the D720 patent pursuant to 35 U.S.C. § 289;
- (G) Ordering that Defendants pay HPE's costs, expenses, and interest, including prejudgment interest, as provided for by 35 U.S.C. § 284;
- (H) Declaring that this is an exceptional case and awarding HPE its attorneys' fees and expenses as provided for by 35 U.S.C. § 285; and
- (I) Granting HPE such other and further relief as the Court deems just and appropriate, or that HPE may be entitled to as a matter of law or equity.
